How to use this guide

Work in order: define the role, build the inventory, create a verified master CV, customize applications, prepare episodes, and track results. Prompts don't replace facts—they turn real material into clearer documents.

Absolute rule: If you can't explain and demonstrate a sentence during the interview, don't put it on your CV.

Recommended workflow

Phase	Input	Output
1. Target	Roles and constraints	Placement
2. Inventory	Experiences and tests	CV master
3. Analysis	Announcement	Requirements map
4. Adaptation	Master CV + ad	CV and letter
5. Interview	Episodes + research	Answers and questions
6. Review	Outcomes	Fixes

PART I

Strategy and foundation

Use AI with authenticity, target yourself, read ads, and build a measurable process.

01. Using AI without losing authenticity

AI must help you remember, organize, compare, and rewrite. He does not have to invent experiences, results or skills.

Assistant, not substitute

You provide facts, examples, and decisions; AI proposes structure and formulations. Every final sentence must be true and defensible in conversation.

Minimum data

Anonymize names, addresses, phone numbers, customers, documents, pay, and confidential company information. Use placeholders until the document is ready.

Traceability

Keep a source card with dates, roles, responsibilities, and achievements. If a sentence cannot be traced back to a fact, it does not enter the CV.

Human verification

Check tone, language, numbers, dates, technology names, and consistency with the ad. Then read aloud: a text that is too artificial can be recognized by its genericity.

Item	Application
To do with AI	Synthesis, comparison, questions, variants, simulations
To be checked	Data, requirements, translations, numbers, claims
To be decided	Target role, limits, priority, availability, negotiation

Checklist

- ☐ I used verifiable facts.
- ☐ I linked the content to the target role.
- ☐ I have removed unnecessary personal data.
- ☐ I can explain each statement with an example.
- ☐ I checked language, dates, names and links.
